COLLEGES & UNIVERSITIES: A BETTER WAY TO CLEAN

Due to Covid-19, colleges & universities are facing unprecedented challenges to maintain clean environments that also meet student and faculty expectations. As cleaning routines become more rigorous and frequent, the chemicals that you use have an impact on the wellbeing of your students, faculty and the environment. Now, institutions like yours can choose a better way to clean with commercial cleaners designed to have a lesser impact on people and the environment, with no compromise on performance.

Are you cleaning more frequently due to Covid-19?

Are you concerned about the cleaning chemicals your students and faculty come in contact with?

Have you considered commercial cleaners designed for the wellbeing of people and the environment?

Professional Cleaning Solutions for People and Planet

Seventh Generation, a B-Corp Certified company and an EPA Safer Choice Partner of the Year, offers a range of professional front and back of house cleaning solutions to help your students and faculty feel secure.

Botanical Disinfectants

- Kills 99.9% of bacteria and viruses*
